

BAR STAR CATTLE - and - ERNST HEREFORDS

2021 BULLS FOR SALE
by private treaty

Chad and Stephanie Murnin
Musselshell, Montana

Marshall Ernst Family
Windsor, Colorado

Welcome!

Our Program:

1. Never chase trends. Phenotype will always be our number one priority because with the right type of cattle all else can be obtained. A good bull starts at the ground where feet and leg structure are critical to longevity which is linked to profitability. (Hoof trimming will NEVER be part of our management practices. We trim with a livestock trailer.) Bulls must look like bulls. Masculine bulls produce feminine females. Sheath size and angle and testicle shape and size are critical. Body depth is linked to ease of flesh. We want cattle that convert feed to condition. Square made muscular cattle will never fall out of fashion. We are producing meat animals so big backs and big hips will always be selected for. Mature cattle weight should be managed but just as importantly mature cattle height should be moderate. There are a lot of big inefficient cattle in the industry, we certainly don't need more.
2. Pounds are dollars. Revenue is generated only a few times a year in the cattle business. The more lbs. you have to sell the bigger the payday. Rapid growth to a plateau of acceptable size is the main objective. EPDs are a tool. Use them as such. Make sure you have the right tools for the job but never ever single trait select. We have parameters that our herd bulls must reside within.
3. Good genetics are bred in, not fed in. We study pedigrees and mating decisions and frequently linebreed. This improves the consistency of our cattle and creates more genetic explosion for our customers.
4. Maternal traits are critical. Calving ease, vigor at birth, udder and teat quality are all important but can quickly be outweighed by a mother with no breed in brainpower to care for her calf.
5. Don't forget about carcass traits if you can have it all pass on a good product to the consumer. Remember black cows have a lot of marbling bred in...as do Holsteins.

Thank you to all of our current and future customers. We stand behind our product and are proud to offer this set of consistently bred, highly functional bulls for sale. If you need any help marketing your cattle please reach out to us. We consistently have high demand for Bar Star genetics.

-CM

Ernst Herefords has its roots going back to 1964 when Marshall purchased his first Hereford to show in 4H. From that first animal Hereford cattle have been in his blood. Upon graduation from college with a degree in Meat and Animal Science he and his new bride, Barbara, started Ernst Herefords in their home state of Wisconsin. Today Ernst Herefords is headquartered in Greeley, Colorado. Cattle are pastured in the foothills of the Rockies at 7500 to 8500 feet of elevation on what most consider modest pasture ground in semi-arid conditions. Annual rainfall in this region is about 11 inches annually. 2020 yielded about 7 inches. This environment produces hardy cattle that are adaptable to rough conditions. Our cowherd is focused on providing bulls with balanced EPD's with emphasis on maternal, low birthweight and rapid growth characteristics. The look of the cattle is important as well. The bulls are deep and thick, on good foot and leg structure. Many of the bulls carry eye pigmentation. They look like bulls should! We value your appraisal of our genetics.

The Hereford business for us is what makes us tick. We were fortunate to raise 4 children around the cattle and I think it made them all better individuals for it. Our son Kevin, his wife Courtney and their daughter Linley are partners in the Colorado operation. Stephanie Murnin, our second oldest, her husband Chad and their two kids Harrison and Hennessy own Bar Star Cattle in Musselshell, MT where the bulls are currently. Melissa and Katheryn are our two other daughters and they often come assist when needed with their husbands Jeremy and Kyle, respectively.

We really appreciate Stephanie and Chad and the crew at Bar Star Cattle inviting us to sell our bulls with theirs private treaty. Our programs of quality genetics are rooted in similar philosophies but bloodlines are different giving you, the buyer, a much greater selection of bulls to choose from.

We all look forward to your visiting Bar Star Cattle and evaluating the bulls for yourself. Thank you in advance for your interest!

-The Ernst Herefords Crew

BULL SELECTION

We encourage you to come look at our bulls located at the ranch in Musselshell, Montana. Videos of bulls are available on our websites. Bulls are considered sold and held with full payment. In the unusual circumstance your bull does not pass semen test you can apply your payment to another bull if available or get a full refund.

BAR STAR BREEDING GUARANTEE

All animals in the sale are guaranteed breeders. All bulls will be covered with a first breeding season guarantee for reproductive injury. Breeding season is defined as the first 60 days following the first turnout of bulls. 50% of the value of a bull that encounters reproductive injury (sheath and testicles) will be given as a credit towards a future purchase or towards a replacement bull if one is available. Any injury must be diagnosed by a seller approved veterinarian. Please notify us as soon as possible should this occur, and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2021. This is not an insurance policy nor does it cover mismanagement or neglect or death.

BAR STAR SEMEN/GENETIC RETENTION

We are very excited about the bulls in our program offering, therefore we reserve the right to retain a quarter semen interest and/or in herd semen use on any bulls we offer for sale. Collection will be done at the buyers convenience and Bar Star Cattle's expense.

DELIVERY

Bulls will be semen tested in late March and deliveries will start the first part of April. Delivery is free for bulls sold in Montana and designated areas of Wyoming and Colorado. Delivery to other locations will be made upon request.

VOLUME DISCOUNT

We do offer a volume discount. 2 bulls will receive a 2% discount, 3 bulls will receive a 3% discount on up to 5 bulls will receive a 5% discount. The max discount is 5%.

BULL CARE

Bulls are developed at the ranch on Hubbard feeds amino grower ration and bunk fed to help improve docility. Bulls are grown until delivery at no cost to the buyer. We follow a vaccination protocol developed specifically for our program based on our veterinarian and our Zoetis representatives recommendations. Bulls have to pass a breeding soundness exam before delivery.

HEIFER SAFE

Certain bulls in this listing are marked as safe for use on heifers. This symbol represents the bulls' data to be heifer safe.

BAR STAR REBELLION 013 ET

Another Belle Air full brother in this years' bull offering. He is super thick, dark, manly, and ready to breed registered Hereford cows! He was also part of the pen shown at the Cattlemen's Congress and sold through the National Sale. He was picked up by a registered Hereford breeder, Ernst Herefords, CO. They are very excited about their new bull!

This bull has been a fun one to raise. He has it all. Muscle, marbling, structure, pigment, huge testicles, pigment, big profitability indexes, and an awesome disposition. He was recognized by many top breeders while on display in Oklahoma. He was the high selling bull at the National Sale, selling to Ye Ole McDonald Farms, MI and the Fresh Prince Syndicate. We wanted to show you the entire crop we raised so we felt he deserved to have a spot in the catalog so you could see him for yourself.

This bull defines why we love the Magnitude progeny. He's thick, dark and pigmented. His famous dam 84B clicked well with this mating. His maternal half brother sells as 082. Member of our OKC pen. Sold in OKC sale to Malone Hereford Farm, KS.

One of the most moderate framed bulls in the now famous flush. Double goggle eyed, thick, sound and we will stack his kind against any. We liked this mating so much that we plan on having more full sibs in the future. This bull was the high selling bull in the BHSS sale to Hoffman Herefords, SD.

The "big" brother in the now famous flush. Huge footed, big testicles that have a great shape, and powered up. A tick bigger framed than his brothers, and his numbers match being in the top 10% of the breed for growth. If you feed your own cattle or get paid premiums for carcass and feedlot performance, look here! Big profitability indexes with a CHB number in the top 5% of the breed! Full brother to 016.

The lone bull out of this flush for 2020, he's a chunky made, big backed, straight lined, and a masculine dude. He is good enough to work in either a purebred or commercial setting. Top 5% of the breed for marbling. We think enough about this bull that we put more embryos in out of this mating and expect more like him to be born in 2021.

Big footed, long bodied and performance oriented. His dam has been a consistent producer and one of the best uddered cows you will find. Lined up pedigree going back to breed legend 719 three times. This one will raise scale crushing calves. He's got the stereotypic big testicles of his sire. He's an ET calf and full sib to 009.

Every year we leave the testicles in a few bigger birthweight bulls because they excel in growth. Pounds are dollars in the beef industry. Use this bull on cows and reap the rewards of added payweight on shipping day. He's dark red and has a huge goggle eye that you can't look past. He's stout but shaped right. If you don't like him, we have a slug of black cows that he will be used on. Huge goggle eye on opposite side of this picture.

THE BALD-FACED TRUTH ABOUT HEREFORD GENETICS

It's obvious – Hereford-sired calves deliver a \$51 increase in net profit per cow, per year.* Hereford genetics bring legendary hybrid vigor, improved fertility, feed efficiency and easy-handling docility to your program. Read the research, and see why Hereford heterosis pays off, at [Hereford.org/genetics](http://hereford.org/genetics).

*Compared to Angus-sired calves. Source: Daley, David A. and Earley, Sean P. Impacts of Crossbreeding on Profitability in Vertically Coordinated Beef Industry Marketing Systems. American Hereford Association. Retrieved from <https://hereford.org/wp-content/uploads/2017/02/HarrisHeterosisReport.pdf>. 57100-B07

This one is out of Trusted a bull we bought from Ernst's and a daughter of our 410 donor, making her a half-sister to Magnitude and other famous brothers we have raised. This one will add muscle and maternal all in one.

Super stylish, dark red bull here that you can't tell in the pen is a younger bull. He's flat put on the gain and he will make some awesome structured, big performance cattle.

This is one powerful dude, and his momma is a donor for us. She's flat out good. Don't let his birthweight scare you. He's picture perfect in his structure, has an arrogant look to him, and has a big, massive hip. Muscle weighs up. He genomic'd better than his BW implies and this time we will believe it.

This son of Revved Up is out of one of our top first calf heifers. This is one is guaranteed safe for calving ease but isn't built like a lot of advertised heifer bulls. Potential MD carrier so is recommended only on black cattle and there will never be a problem. We hope to have the test back shortly.

This bull we missed pasting or part of it. He's got manageable horns and he's massive. Big ribbed, big hipped, and he has a nice set of consistent numbers.

Dark red, big hipped power bull. This is the first time we have offered falls, it's a long story. Short story is these long-aged bulls will flat out breed a ton of cows. We summered them on grass so they are fed for the long haul. This one is flashy.

Out of one of the most fertile cows you will ever find. She's produced some outstanding calves over the years and this one fits right in. This bull is moderate, thick and will leave you daughters behind that will get bred no matter the conditions.
